You may be interested to know that SPS were the first people to introduce the Reach & Wash system throughout Guernsey. The real science behind the reach and wash commercial windows cleaning system is the fact that we use pure water. It might sound rather simple but the truth is, pure, deionized water is especially good for cleaning windows.

The Slimline Power System provides advanced controller features in a compact, cost-efficient footprint. The SPS shelf is 1.75" high, 10.3" deep and mounts in 19-inch or 23-inch-wide frames, with three power slots for rectifiers and distribution.
