

Do PV poverty alleviation pilot counties increase rural disposable income?

H1. The establishment and implementation of PV poverty alleviation pilot counties has increased rural disposable income. H2. PV poverty alleviation becomes increasingly effective over time (cumulative effect). Therefore, counties that have been pilots for longer periods will see an additional poverty reduction effect.

Does photovoltaic poverty alleviation improve environmental sustainability in poverty-stricken areas?

The direct effect of photovoltaic poverty alleviation policy on environmental sustainability in the poverty-stricken areas from a micro perspective is not optimistic. Poverty alleviation projects related to renewable energy should consider increasing the participation of poor households.

What is photovoltaic poverty alleviation (PVPA) program in China?

The Photovoltaic Poverty Alleviation (PVPA) program is another program implemented in China. PVPA is a renewable energy assistance program targeted at rural communities using photovoltaic (solar energy) power plants. This program aims to create renewable energy and provide more electricity in rural areas.

Does poverty alleviation work in rural areas?

However, in practice, the two programs have not yet been converted and are still distributed (Nugroho et al., 2021). A total of 11 out of 22 selected research articles discussed poverty alleviation in rural areas. In China, several rural poverty alleviation programs are being carried out. One is the Targeted Poverty Alleviation (TPA) program.

Does PV improve poverty alleviation?

The PV poverty alleviation effect is stronger in poorer regions, particularly in Eastern China. Our results are robust to alternative specifications and variable definitions. We propose several policy recommendations to sustain progress in China's efforts to deploy PV for poverty alleviation.

Do poverty alleviation programs exist worldwide?

Therefore, this study aims to identify poverty alleviation programs worldwide and analyze the opportunities and challenges of poverty alleviation in the world since the pandemic outbreak, especially from 2020 to 2022. This study used a qualitative approach with a Systematic Literature Review (SLR).
