

How can solar power help New Zealand?

We're working with the sector on New Zealand's renewable energy and low-emissions transition. We're responsible for the governance and regulation of New Zealand's electricity industry. Solar power can help you become more self-sufficient, reduce your carbon footprint and reduce your energy costs.

Why should you install solar panels in New Zealand?

Solar panels are a clean and renewable source of energy. By harnessing the power of the sun, we can reduce our reliance on fossil fuels and lower our carbon footprint. There are numerous benefits to installing solar panels in New Zealand. One of the main advantages is the potential for significant cost savings on your energy bills.

How are solar panels installed in New Zealand?

The installation process for solar panels in New Zealand typically involves several steps. First, a site assessment is conducted to determine the suitability of your property for solar panel installation. Factors such as roof orientation, shading, and structural integrity are evaluated during this assessment.

Is going solar a good idea in New Zealand?

Going solar helps the environment - it creates clean, green energy and is a great way to reduce your carbon footprint. Going solar demonstrates your commitment to sustainability and will help New Zealand achieve its target of net zero greenhouse gas emissions by 2050. Is your property suitable for solar?

What is New Zealand's largest solar farm?

(Source: Supplied) Plans have been revealed for what's believed to be New Zealand's largest solar farm. The joint British-New Zealand venture has consent to build the 182ha Tauhei Solar Farm near Te Aroha in Waikato. Expected to start construction this year, it aims to provide power for the equivalent of 35,000 homes.

How many solar panels can a New Zealand solar farm produce?

Subject to obtaining all necessary consents and approvals, the solar farm's approximately 330,000 solar panels would generate more than 270 GWh per year, enough renewable electricity to supply the equivalent of approximately 35,000 New Zealand homes. Utility or grid-scale solar farms are set to play a key role in the electrification of New Zealand's economy. Although few farms are currently operating, grid-scale solar accounts for approximately half of the new generation interest in Transpower's pipeline and makes up the largest share of advanced projects.
