

Is Morocco dependent on Western Sahara for its energy supply?

But these developments have made Morocco partly dependent on Western Sahara for its energy supply. Morocco already gets 18% of its installed wind capacity and 15% of its solar from the occupied territory, and by 2030 that could increase to almost half of its wind and up to a third of its solar.

Is Western Sahara a 'question of decolonisation'?

Western Sahara is the only African territory remaining on the list. It's also the only territory where the administering power column is left blank - a footnote explains the UN considers it a "question of decolonisation which remained to be completed by the people of Western Sahara".

The first round of land allocations in Morocco's green hydrogen investment process may soon be completed and is likely to include substantial areas in the contested territory of Western Sahara. African Energy has ...

Sunel Group is currently constructing and has already completed 500+ of Solar PV Projects amounting to a total capacity of over 2.000 megawatts in Greece, Cyprus, Spain, Turkey, France, United Kingdom, Ukraine, Dubai and Malawi, with a full pipeline of new projects in 7 more countries. Western Sahara is very sunny and surprisingly windy - a natural renewable energy powerhouse. Morocco has exploited these resources by building three large wind farms (five more are planned)...

The sites will range in size from 20MW to 120MW and are being built by construction and engineering joint

venture Ameresco Sunel Energy. Axel Thiemann, CEO of Sonnedix, said: "Over half of total capacity awarded in this year's CfD round was to solar projects, demonstrating the crucial role solar has to play in the UK's transition to ...

This has been a big year for King Mohammed VI. His government is harvesting major diplomatic wins--thanks to hardball tactics on migration. As Europe wrestles with migration and energy challenges, Morocco ...

Morocco is set to embark on its most ambitious renewable energy project to date, with plans to establish a massive solar and wind power installation in the Western Sahara Desert. The energy generated will supply Casablanca, Morocco's largest city, via an extensive 1,400-kilometer electricity transmission network .

The energy produced on occupied land increases Morocco's dependency on the territory that it occupies. As such, the projects fundamentally undermine the UN peace efforts in Western Sahara directed towards allowing the expression of the right to self-determination of the Saharawi people.

The first round of land allocations in Morocco's green hydrogen investment process may soon be completed and is likely to include substantial areas in the contested territory of Western Sahara. African Energy has identified projects requiring the installation of at least 72GW of wind and solar generation, and more are likely to follow.

SUNEL GROUP is a globally recognized EPC Contractor and Developer for Solar projects. With its" headquarters in London, regional headquarters in Valencia, Athens, Istanbul and Dubai and a total of 8 corporate offices worldwide, the group is staffed by over 350 employees consisting of highly-experienced and specialized teams of engineers ...
