1 ??&#0183; Ecosystem Disruption: Animals like polar bears, seals, and penguins rely on ice-covered habitats, many of which are disappearing. Protecting Snow and Ice to Combat Climate Change. To preserve the albedo effect and its cooling influence on our planet: Reduce Carbon Emissions: Lowering greenhouse gas emissions slows the warming that causes ice to ...

POLENET is a global network dedicated to observing the polar regions in a changing world. The project focuses on collecting GNSS and seismic data from autonomous systems deployed at remote sites spanning much of the Antarctic ice sheets.

Southern Senegal and The Gambia are part of the Sudanian climate zone, which is known for dense woodlands, savannas, and wetlands. These ecosystems are visible to the south of the Gambia River (image left). The region north of the river (right) appears much brighter due to the exposure of bare soil and the dearth of visible vegetation.

This image originally appeared in the NASA Earth Observatory story The Gambia. Astronaut photograph ISS062-E-137053 was acquired on April 6, 2020, with a Nikon D5 digital camera using a 58 millimeter lens and is provided by the ISS Crew Earth Observations Facility and the Earth Science and Remote Sensing Unit, Johnson Space Center.
