Centrica needs to replace cashflow from businesses in natural decline, especially gas upstream, to fund clean growth beyond 2024-25. Clean growth includes the potential conversion of gas storage at Rough to hydrogen. At the same time, the Regulator needs to develop a remuneration mechanism to support hydrogen conversion from gas.

Being one of the world's largest of its kind, the 49MW battery storage facility will be able to supply electricity to approximately 50,000 homes, responding to fluctuations in demand in less than a second.

In line with our strategy to decarbonise the portfolio and reduce our exposure to oil and gas production, we have committed not to explore for new hydrocarbon reserves, instead focusing on ensuring we can fund our decommissioning liabilities while pursuing opportunities to leverage existing infrastructure to promote energy security and help the UK ...

We trade power, gas, LNG, and energy attributes and connect producers, suppliers and offtakers in the wholesale energy markets - and we provide our clients with the best route-to-market services available to the market today with physical and financial settlement approaches.
