

The report describes an e8-funded small-scale solar power system project in Tuvalu together with lessons learned and success factors. The e8 comprises of 10 leading electricity companies from the G8 countries promoting sustainable energy development through electricity sector projects and human capacity building activities in developing nations ...

Renewable energy in Tuvalu is a growing sector of the country's energy supply. Tuvalu has committed to sourcing 100% of its electricity from renewable energy. This is considered possible because of the small size of the population of Tuvalu and its abundant solar energy resources due to its tropical location.

The project, Facilitation of the Achievement of Sustainable National Energy Targets of Tuvalu (FASNETT), will assist the government's energy sector targets including generating 100% renewable energy-based electricity by the year 2020, as well as increase energy efficiency on Funafuti by 30%.

Tuvalu stands as a beacon of resilience in the face of climate and economic vulnerabilities and despite its status as one of the smallest atoll nations, Tuvalu is taking significant strides to lead ...

The Tuvalu ESDP will support a reduction in the reliance on imported fuel for electricity generation through investment in renewable energy development, increasing the efficiency of energy supply and use, and improving the capacity of the Government of Tuvalu and the national energy supplier - the Tuvalu Energy Corporation (TEC) - to better ...

The project aims to facilitate the development and utilisation of feasible renewable energy resources and applications of energy efficient technologies in Tuvalu. This will help the Government of Tuvalu achieve its updated target of reducing greenhouse gas emissions from the electricity generation (power) sector by 100% by the year 2025 as per ...
