

U S Virgin Islands pure energy centre

The U.S. Virgin Islands (USVI) is working with the Energy Department to transition from fossil fuel energy to the renewable resources that are abundant on the islands. By reducing its dependence on oil, the USVI is taking strides toward greater economic stability and a clean energy economy.

This visionary partnership is set to transform the energy landscape of the US Virgin Islands through the deployment of cutting-edge Battery Energy Storage Solutions (BESS) across six strategically positioned solar parks. The implications are monumental, with massive cost savings and a resounding commitment to decarbonization.

Power generation in the U.S. Virgin Islands has been challenging due to aging infrastructure that has resulted in reduced efficiency, increasing emissions levels and more frequent maintenance. These issues in turn have caused more downtime and higher cost of ...

The Virgin Islands Energy Office (VIEO) develops and delivers policies and programs designed to support the growth and sustainability of clean, resilient, reliable energy production and distribution in the Virgin Islands in order to create an affordable energy future for all residents, businesses, communities, and institutions.

The Virgin Islands Energy Office (VIEO) is poised to experience a significant increase in federal support, following a \$14 million funding boost this year. The agency is looking ahead to a substantial influx of over \$150 million in 2024, as noted in ...
