Salto's Universal Energy Saving Device (ESD) system achieves savings and comfort. Energy usage is one of the highest operating expenses hotels, shared living spaces and the cruise industry incurs. The cost of electricity has risen dramatically in the past few years and will only continue to rise.

Energy Saving Devices, or ESDs, are systems designed to improve the efficiency of the ship propulsion. The most appropriate device or combination of devices will depend on the specific vessel. They must be designed in conjunction with the propeller or propeller-nozzle assembly to achieve the greatest propulsive efficiency.
