

Venezuela sinking solar prices

El potencial solar que tiene Venezuela es una gran oportunidad. Se le adjudica un potencial teórico promedio de 5,35 kilovatio hora en cada metro cuadrado al día (kWh/M²), solo superado en Sudamérica por Surinam (5,378), Bolivia (5,424), y Chile (5,758), según los datos publicados por el Global Solar Atlas.

Venezuela is a nation overwhelmed by relentless blackouts and is searching for energy alternatives amid a long-lasting energy crisis. In Maracaibo, the second largest city in the country, solar energy has emerged ...

The regional analysis of the Venezuela Solar Energy Market reveals specific insights into solar energy adoption, potential, and market characteristics across different regions of the country. Venezuela's geographical location near the equator provides abundant sunlight and favorable conditions for solar energy generation.

At the beginning of 2023, Venezuela's Ministry of Electric Energy announced a new plan to install 2,000 megawatts (MW) of solar energy over the next three years. According to a video the ministry posted on Instagram, this will begin with 500 MW of capacity in the states of Zulia, Falcón and Lara, followed by a second and third phase to ...
