DOI: 10.1016/J.RSER.2017.05.279 Corpus ID: 114360030; The research on multi-agent system for microgrid control and optimization @article{Khan2017TheRO, title={The research on multi ...

Xi'an Jiaotong University - 96 - microgrid system - power electronics - hydrogen technology ... X Wang, J Huang, Y Cao, T Yang, Q Xu, C Zhang, X Zhang. IEEE Transactions ...

This paper provides a comprehensive overview of the microgrid (MG) concept, including its definitions, challenges, advantages, components, structures, communication systems, and control methods, focusing on low ...

the profitability of electric and thermal decoupling, and the quantification of the microgrid demand response in relation to electricity prices. To tackle these challenges, we investigate ...

In this paper, a virtual-impedance-based fault current limiter (VI-FCL) is proposed for islanded microgrids comprised of multiple inverter interfaced distributed generators (DGs). Considering ...

A novel control strategy for coordinated operation of networked microgrids (MGs) in a distribution system considered as a stochastic bi-level problem with the DNO in the upper level and MGs ...
