

The UN regards Western Sahara as a non-self-governing-territory without an administering power in place. The International Court of Justice has found Morocco's claim to the territory null-and-void, findings echoed in a body of EU ...

The initial stages of another renewable energy project has been launched in the disputed Western Sahara region, which is under the control of Morocco. The Janassim project recently launched its measuring campaign of solar and wind energy potential.

Electric car battery packs use sophisticated sensor control and energy management systems as a mobile power bank to draw power from the local power grid. They are also able to push energy back to the grid, as well as being able to provide A/C plug power directly from its battery and inverter.

The first round of land allocations in Morocco's green hydrogen investment process may soon be completed and is likely to include substantial areas in the contested territory of Western Sahara. African Energy has identified projects requiring the installation of at least 72GW of wind and solar generation, and more are likely to follow.
