

What flowers can be grown in a locker

What plants can you plant in a container?

Alan Titchmarsh shares his five favourite plants for containers in this short video from BBC Gardeners' World Magazine. Variegated foliage is a real pick-me-up all year round. For a striking display, try it with creeping Jenny (*Lysimachia nummularia*), tulips, golden narcissi or primroses.

What flowers can I plant every year?

Annuals and tender perennials are usually only grown for the year before being discarded, so don't require much root space - and you can try different colours and flowers each year. Classic choices include petunias, lobelia and bidens. For scent, try nicotiana, night-scented stock and sweet alyssum.

What are the most decorative container flowers?

One of the most decorative container flowers on this list is the dahlia. There are a bunch to choose from. Some have tiny 2-inch pom poms, and others get larger "dinner plate" blooms that span 15" across. The most common are purple, pink, yellow, or white. They will reach 3-4' tall, and prefer full sun.

Which plants work best in pots all year round?

Some plants work well in pots all year round. These include hardy evergreen foliage plants like yucca, English ivy, variegated euonymus and heuchera, and flowering plants like *Skimmia japonica* and hebes. Evergreens tend to be best for year-round pot displays as they are always in leaf and therefore always have something to offer the display.

Which plants are best for a pot display?

Evergreens tend to be best for year-round pot displays as they are always in leaf and therefore always have something to offer the display. Match them with plants that flower at different times - from spring through to winter.
