

# What if I don't want to install photovoltaic panels

Can you install solar panels without putting them on your roof?

Still, a portable solar panel can be convenient for short-term use. Solar panels can be installed as siding, sculptures, window glass, awnings, and even on the ground. Here's where you can install solar panels without putting them on your roof.

Can you collect electricity without putting solar panels on your roof?

Yes, it's possible to collect electricity from the sun without putting solar panels on your roof. If you want to take advantage of solar energy but you can't (or don't want to) put solar panels on your roof, you do have other options.

Can solar panels be installed on a house?

Solar photovoltaic (PV) panels can be installed on a wide range of homes. We've heard from people installing solar panels on bungalows and terraces, as well as semi-detached and detached houses. If your main house roof is unsuitable (a thatched roof, for example), solar panels can instead be installed on a garage or other outbuilding.

Are solar panels right for You?

Solar panels are best for people who live in good solar states with solar-friendly policies, like net metering and solar incentive programs. Homes with south-facing roofs and lots of unshaded space are also ideal for solar. Homeowners with high electricity bills are among those who can benefit the most from going solar.

Should you install solar panels again if you move home?

Imagining your house filled with mess from a lengthy installation could be enough to put you off considering solar panels. But few owners complained to us about the installation being disruptive, and 80% said that they'd install solar panels again if they moved home.

Where can I install solar panels?

Sheds, garages, greenhouses, and carports can all offer suitable locations for solar installations. Solar carports and solar sheds generate zero-emissions electricity and provide shade, so you could even power an electric vehicle with your garage roof solar panels.
