

Where to get cheap photovoltaic panels

Are cheap solar panels better?

Cheaper solar panels tend to be less efficient, which means they generate less solar electricity and don't last as long as more expensive and better-quality panels. This article will explain what to look for in solar panels of different price ranges, and delve into the pros and cons of cheap solar panels. Where do you want to install solar panels?

What are the cheapest types of solar panels?

Polycrystalline solar panels and thin-film solar panels are the least expensive types of solar panels, typically costing around 20% less than monocrystalline panels. However, they are also less efficient.

How do I choose a cheap solar panel?

When it comes to questions around quality and reliability, there are three important things to consider before you select a cheap solar panel: the product, the supplier, and the installation. On the first point, your solar system's warranty matters. It's what you'll turn to should one or more of the panels start to fail: so the longer, the better.

How much do solar panels cost?

But the average solar panel system of 3.5kWp will cost around £7,000 to install, according to estimates from the Energy Saving Trust. The exact cost will vary, depending on the size of your home and how much electricity you want to produce. See how much you can expect to pay. Find out: are solar panels worth it?

How can I get solar panels in the UK?

The cheapest way to get solar panels in the UK is to apply for one of the government's grants or loan schemes. For instance, the ECO4 scheme can cover up to 100% of the costs for lower-income households, and Solar Together typically cuts 30-35% off the cost of a solar panel system.

How do I compare solar panel prices & quotes?

Here you can compare solar panel prices and solar panel quotes with ease and find lowest cost panels. Simply type your postcode into the box below and select one or many local and national, trusted solar panel installers and ask them for a quotation.
