

# Who should I contact for customer service when installing photovoltaic panels

Who will install solar panels?

Who will be Installing the Solar Panels? Many solar installers will employ subcontractors to erect and remove scaffolding. This is common practice. But it's always wise to instruct a company who is going to be carrying out the installation, rather than palming it off to a third party.

Why should you hire a solar panel installer?

However, to ensure that your solar PV system produces maximum electricity for decades, it's important to hire the best solar panel installer for the job. The best solar panel installers are qualified specialists who fit the hardware, offer the best workmanship and the aftercare your system needs.

Do I need planning permission for solar panels?

For more information, contact your local planning authority - your local council - for advice about planning permission for solar panels. If you are a leaseholder, you'll also need the permission of the freeholder to install solar panels. Is my home suitable for solar PV panels?

How do I choose a solar PV company?

Check local planning regulations to make sure you're allowed to install a solar PV system (see above). Check that the solar PV company is MCS certified and a member of the Renewable Energy Consumer Code (RECC). Don't accept a price over the phone before the firm has visited. Get an Energy Performance Certificate for your home.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Where do solar panel installers work in the UK?

Most solar panel installers in the UK operate locally, within a city or county. Some operate nationally. There are pros and cons to each option. National solar installers tend to offer a wider range of the latest products, including solar storage batteries as well as panels and inverters.

Solar panels are also typically covered by a manufacturer warranty, so if you do notice a fault, you should first contact the company that installed them before going to your insurer. If you don't yet have solar panels ...
