

Can Europe release grid capacity for new wind farms?

In a new report WindEurope analyses the grid access challenges in Europe and proposes practical, immediate actions to release grid capacity for new and repowered wind farms. The EU wants to increase its wind energy capacity from 220 GW today to 425 GW by 2030 and 1,300 GW by 2050.

Will Europe's wind power package be a game-changer?

Together these actions will be a game-changer for Europe's wind industry and for Europe's ability to meet its climate and energy goals. Today the European Commission launched its Wind Power Package, aiming to accelerate the build-out of wind energy in Europe and to strengthen the competitiveness of European wind energy manufacturing.

Will the wind power package be enshrined in a Wind Energy Charter?

The Commission propose to enshrine support for the Package in a dedicated Wind Energy Charter to be signed by the end of the year. WindEurope CEO Giles Dickson says "The Wind Power Package is a game-changer for Europe's wind energy industry. The new actions on finance, auctions and permitting will speed up the development of wind farms.

What does the European Commission's wind power package mean for Europe?

Today the European Commission launched its Wind Power Package, aiming to accelerate the build-out of wind energy in Europe and to strengthen the competitiveness of European wind energy manufacturing. Europe's energy strategy REPowerEU wants 420 GW of wind energy by 2030, up from 205 GW today.

What is the wind power package?

WindEurope CEO Giles Dickson says "The Wind Power Package is a game-changer for Europe's wind energy industry. The new actions on finance, auctions and permitting will speed up the development of wind farms. And crucially they'll help Europe's wind energy supply chain deliver the equipment for that.

Will £200 million support offshore wind power 8 million homes?

The additional offshore wind capacity resulting from the funding alone could power around 8 million homes. Today's announcement contains £200 million to support offshore wind projects. This will help meet the manifesto commitment to ensure the UK has 40GW of capacity by 2030.

A huge upgrade of the UK's electricity network would see a host of pylons and cables transporting power from offshore wind farms around the UK. Power lines from Anglesey to Swansea, Grimsby...

Wind power was once again the most important source of electricity in 2023, contributing 139.8 terawatt hours (TWh) or 32% to public net electricity generation. This was 14.1% higher than the previous year's ...

See all the JERA'S press releases over the years of operation. Visit our page to read more. JERA is Japan's largest power generation company which operates entire supply chain, from fuel upstream and procurement to ...

Eurus Energy Announces Investment in Offshore Wind Power Generation Project in Scotland - Eurus Energy Group's First Investment in Offshore Wind Power Generation Project - Eurus Energy Holdings ...

The European Commission has presented actions to boost the European wind power industry. To achieve the EU target that requires 42.5% of EU energy to be renewable by 2030, we will need a massive increase in wind ...

The government's British Energy Security Strategy sets out how Great Britain will accelerate the deployment of wind, new nuclear, solar and hydrogen, whilst supporting the production of domestic...

Today the European Commission launched its Wind Power Package, aiming to accelerate the build-out of wind energy in Europe and to strengthen the competitiveness of European wind energy manufacturing. ...
